

FINAL BID RESULTS

Contractors were asked to bid a sample five (5) position 9-1-1 computer telephony system, with the capability to build a 2-10 position configuration. The [Standard System](#) provides all the necessary elements for the delivery of 9-1-1 calls to the call taker, including system installation, training of operators/system administrators and five (5) years equipment/software maintenance.

Shown below is a list of the ten (10) successful contractors who complied with the contractual and technical requirements of the bid. The Client Score column indicates how agencies with similar equipment scored the respective company on its ability to provide services similar to those proposed in the bid specifications. A maximum score of 825 means that the five PSAPs evaluating the contractor gave them the highest possible scores for different service categories. The cost and client scores determined the amounts in the Final Score column. These scores were used for bid evaluation purposes.

Bid prices shown below are for a sample five (5) position PSAP. Prices on contract are the maximum allowable and do not necessarily indicate what a PSAP will pay for a particular configuration. Listed below is the product line upon which a contractor's bid was graded. See the [Contractors And Contract Price Lists](#) to view all the products a contractor has to offer.

CONTRACTOR	CLIENT SCORE	FINAL SCORE	COST	EQUIPMENT MANUFACTURER
Moducom	780	1480	\$146,420.80	Moducom
Motorola	753	874	\$293,818.54	Plant Equipment, Inc.
Nextira	781	842	\$316,136.06	Xtend
Nine One One, Inc.	825	869	\$310,312.43	Nine One One, Inc.
Pacific Bell	825	1037	\$238,877.21	Positron
Plant Equipment, Inc.	810	969	\$261,391.66	Plant Equipment, Inc.
Positron	810	1328	\$169,822.76	Positron
Siemens	825	890	\$299,400.52	Extend
Verizon	802.5	1003	\$247,706.33	CML
Zetron	825	1163	\$203,561.78	Zetron
